Brian,

Mike Smith has taken over the Falcon site from Jessica Mauricio. Would you please add his name to the e-mail list?

Thanks,
Clare

Subject: FW: Falcon Refinery RI/FS - Data Evaluation Summary Report

Good afternoon

I have been informed by our contractor that the draft data report for the Falcon Refinery RI report is ready for review. The total document is over 1000 pages including lab data information. The main body of the report is around 200 pages. I would like to send only as many hard copies of the total report that your agency needs. I would like to send each agency 1 complete hard copy 1-2 copies of the main body of the report with the appendices on CD and as many CD copies of the entire report that you want. Please let me know if that works for you and your agency. My contract allows 30 days for agency review and comment on the draft report so please let me know if you can return your comments to me by the end of February or 1st week of March. I am planning on holding an informational meet to inform the public where we are in the RI process in Ingleside after the data report has been finalized. I am working at home today/tomorrow so if you want to call me I can be reached at 214 392-1844. I will follow up this email by forwarding various reports of the draft report.

Thanks

Subject: Falcon Refinery RI/FS - Data Evaluation Summary Report

Brian:

We have completed the draft Data Evaluation Summary Report (DESR) and are ready to make distribution of this document. According to the Falcon Refinery RI/FS Work Plan, we are to make 13 hard copies and 13 electronic copies of this document for distribution (EPA - 3 hard copies, 3 electronic copies on compact disc (CD); National Oceanic and Atmospheric Administration (NOAA) - 1 hard copy, 1 electronic copy on CD; Texas Commission on Environmental Quality (TCEQ) - 2 hard copies, 2 electronic copies on CD;; Texas General Land Office (TGLO) - 2 hard copies, 2 electronic copies on CD; Texas Parks and Wildlife Department (TPWD) - 2 hard copies, 2 electronic copies on CD; and U.S. Fish and Wildlife Service (USFWS) - 3 hard copies, 3 electronic copies on CD). As you know, this document contains the laboratory data that we have generated for the site. With that data, the DESR will be 1000+ pages. In an effort to be more environmentally conscious, we would like to find an alternative distribution approach that will require less hard copy pages. One option for the hard copies is to make a hard copy of the text, tables and figures and include the remaining portions of the report (APPENDIX B-DATA VALIDATION REPORTS FOR EPA CONTRACT LABORATORIES; APPENDIX C-EA SUBCONTRACTED LABORATORY ANALYTICAL REPORTS; APPENDIX D-DATA VALIDATION REPORTS FOR EA SUBCONTRACTED LABORATORIES; APPENDIX E-GEOTECHNICAL LABORATORY REPORT; and APPENDIX F- DUPLICATE DATA/DATA RPDs AND REJECTED DATA) as PDF files on a CD. Another option is to only provide the PDF version of the document to the various stakeholders.

We are flexible and can produce and distribute the document in any of these approaches or another approach that you may suggest. Please let me know your preference for the distribution of the Falcon DESR.

Thank you,

Bob Owens
